

Illinois Century Network

The Illinois Century Network is Open for Business !

Lit Service

Lit service is available from the POP locations shown including Ethernet, Waves, MPLS and Dedicated Internet Access. Highly available Internet access with connection to multiple Tier 1 providers and peering with major content providers. Geographic redundancy of the interconnects provides market leading availability. Pricing is location independent and the ICN Master Service Agreement includes a portability option for upgrade with no early termination fee. Attractive wholesale pricing to facilitate broadband expansion throughout Illinois.

Dark Fiber

Dark fiber available throughout 938 miles of network. Dark fiber can be purchased on a 20 year term via an Indefeasible Right of Use agreement or leased monthly for a term of 3 years. IRU pricing for a 20 year term is \$900/strand/mile for a segment between two POPs and \$300/route mile/year for maintenance. Upgrade allowed from lease to IRU with no early termination fee. Man holes every 1 – 3 miles allows fiber interconnect.

Colocation

Colocation available at most POP sites with rack space, AC or DC power, generator backup and UPS. Allows for signal regeneration over purchased dark fiber or provides carrier POP sites for sale of lit service.
